

mRNA Coronavirus Vaccine Study

Kaiser Permanente Washington Health Research Institute is looking for **healthy adults age 18 to 55 years** to help test an investigational vaccine for the **2019 novel coronavirus** (now called **SARS-CoV-2**). You do not need to be a Kaiser Permanente member to be in this study.

This study involves 11 in-person visits and 4 phone visits over about 14 months, starting in March 2020. People who take part in the study will receive \$100 after each study visit.
